PREFACE.

## PREFACE.

---

In selecting the materials for a reference book of this type, the genealogist must work on a large subject, on a large time scale, and yet record only such relevant and essential facts as are connected with the services of the actual participants in the momentous issues of the American Revolution.

Here is no opportunity for fancy to weave a romance, no space for biography, no place for anything but accurate, concise statement of facts directly contributing to the body of proved knowledge concerning the beginnings of American history. The great desideratum is accuracy and this work serves a great purpose if it helps those historically interested to test proof, to secure fullness and soundness in induction, and to restrain, or to employ with safety, hypothesis and analogy.

The student taking up this mere outline of "histories of history" will do well to recall that through each volume of the Lineage Book one thousand individuals have claimed, and established relatedness to the most glorious epoch of our country's history and to the founders and defenders of America's matchless fabric of government.

It is the aim of this brief summary of historic facts to lead the interest of students of genealogy and family tradition into a study of the broader field of National history under the guidance of the American pioneers themselves and by the highway of the American Revolution.
